

Optimization Service

Opti

by IT Patagonia

The **digital transformation** changed users' behavior. Nowadays, they expect instant responses and fast service from the products and services they use.

In this context, companies need to **maximize availability**, aiming to keep their **online channels running 24/7**. They also need to be able to react quickly to any unexpected issues and solve problems in a timely manner.

Challenges

- Impact of batch processes on service availability during business hours.
- Long processing times and delays due to complex architecture (time-outs).
- Errors and cancellations caused by instability in critical chains.
- Lack of experienced talent.

Get a **streamlined chain** and **100% monitored and controlled processes**.

OPTI

our exclusive monitoring and analysis tool for batch and online processes, which automates reports and optimizes processing.

- With **quick implementation**, OPTI addresses the challenges of monitoring, analyzing, and continuously improving batch and online processes.
- It's **fully adaptable to the specific needs, pain points, and weaknesses of each organization**, making it a real solution for real problems – no need to fit into a pre-packaged product.

Monitoring jobs and detecting critical paths.

Visualizing parallel job executions.

Tape inventory management.

Automating daily and monthly reports.

Contingency documentation.

Batch impact analysis and projections.

Automating shift handovers.

Automating non-schedulable manual tasks.

With OPTI, get a streamlined chain and fully monitored and controlled batch/online processes in no time.

Benefits

- Reduce the critical paths to a minimum between 35% and 70%.
- Only the necessary strings for the new day are executed.
- Resolve jobs cancellations and in this way reducing their quantity.
- Eliminate waiting time between one job and the next.
- Reduce and reorganize tables and files used in the Batch.

Platforms

» Control-M, JobTrac, and ProBatch.

» IBM Mainframe, zOS, and DB2.

» Cobol Mainframe and AS400.

» **Distributed:** MS Windows Server, Red Hat Linux, IBM AIX, and Base24.

» **Databases:** Oracle Database, MSSQL Server, MySQL, and Sybase.

Santander **ICBC**

Interbank **Galicia**

Macro

30% or 40% reduction in processing times for critical milestones in the batch chain.

We are one of the best companies to work for!
